27.-30. October 2020

## WIRE DÜSSELDORF

From 30th of March to 3rd of April 2020, the world's most important trade fair for the wire and cable industry will take place in Düsseldorf.

The fair offers innovative new products also for **manufacturers of fasteners** such as nuts.

In Düsseldorf, we will present for the very first time the automatic nut tap **AMGB V** with rose-golden BTIC coating.

This tool was specially developed for fully automatic tapping of nuts in the run-over process.

In the most modern version of the AMGB V, tool life and process reliability have been further increased and the dimension range has been extended downwards to M8.

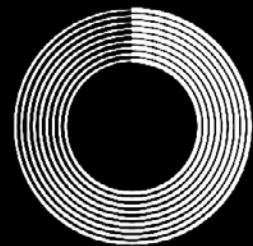

At the wire, we will also be showing the new HVA geometry. The **VARIANT HVA** shows its potential for thread cutting in the reversing process of heat-resistant and stainless steels as well as special alloys.

We are looking forward to your visit at our **stand G69 in hall 16**.
