

MULTI TALENT

STOCK VARIETY

WIDE SPECTRUM

HIGH TOOL LIFE

ALLROUNDER

With our all-rounder taps, we cover an extensive range of materials.

From steel all the way to plastics, they can be used in a wide variety of materials – even up to 3xd!

Our **VARIANT VA** is the tap for through holes, our **DOMINANT VA45** for blind holes. Both tool types are available in different executions, detailed information can be found in the online brochure. ☑

Whether conventional machines or modern machining centers, the all-rounder taps stand for both: **high cutting speeds** and **long tool life**.

With one tool for many materials and applications, you not only reduce your stock variety, but also the number of tool changes.

For more information on our Allrounders, please contact your BASS representative.

ADVANTAGES

- » standard tools
- » broad range of applications
- » reduced stock variety
- » high process reliability
- » long tool life
